Calibration Instructions

**Important note
on calibrated scales in EEC-countries**

**M**

Factory calibrated scales carry the preceding identification on the packaging label.

M

Scales identified by the green M-Label applied on the calibration mark can be operated immediately.

M

Scales calibrated in two steps carry the preceding identification on the label applied to the package.

These scales have already been calibrated (declaration of construction conformity according to EN 45501-8.2) and have to be calibrated again on the working place. This calibration has to be conducted by the certified METTLER TOLEDO Service.

Please contact your METTLER TOLEDO technical service.

Shop scales, used for legal trade are submitted to calibration.

Please respect the current calibration directives in your country.

Safety Instructions

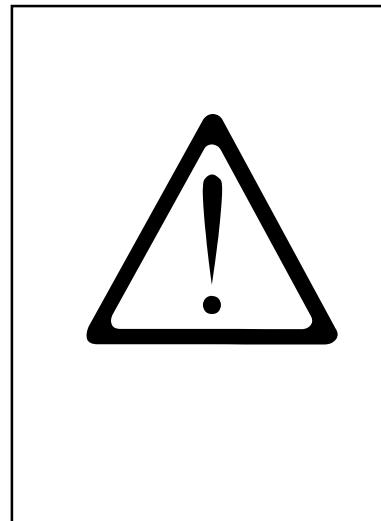

Do not use the scale in the proximity of an explosive gas mixture, of vapors, steam, or dust!

Any electrical device, not equipped with a specific "e" type of protection and used in an area with an explosive atmosphere represents an important danger in this environment!

To prevent any accident, only qualified service personnel is authorized to open this device!

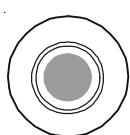

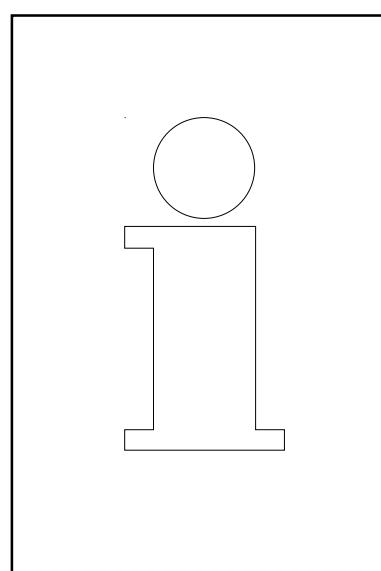

CAUTION!
DANGER OF EXPLOSION IN CASE OF IMPROPER REPLACEMENT OF BATTERY.
DISPOSAL OF USED BATTERIES ACCORDING TO INSTRUCTIONS.

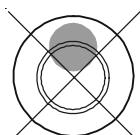

Installation Instructions

In general, your scale is part of a scale network. The installation, leveling and application are handled by METTLER TOLEDO or an authorized dealer. During the introduction you will be comprehensively trained and receive all necessary documentation. Your scale should only be connected to the mains with the power cord supplied.

The water level is used to level your scale. It is fixed at the back of the device. The correct alignment (air bubble has to be in the center of the water level) of the device can be achieved by adjusting the adjustable scale feet. The water level should be checked regularly to assure a correct level reading. When moving the scale, the level should be checked and corrected if necessary.

wrong

Product description

General

The UC-GTouch is an expansion of the UC3 range of scales. This expansion consists of a Self-Service scale with a large Touch Screen Display. With the use of a Touch Screen user interface it is possible to also control Self-Service scales from the central office without any limitation; no more need to exchange the paper pictograms!

The previous limitation regarding the amount of available PLU's on the scale caused by the selected Self-Service keyboard no longer exists. Any amount of PLU's can be displayed. At the same time, the ergonomic user interface (which realizes the latest Usability Engineering know-how) in combination with the structured desktop and the intelligent search function ensures that the user can find his article fast and reliable at any time.

The user interface can be arranged or rearranged at any time corresponding to the current and personal requirements of the customer. Hence Corporate Design can be realized without any limitation. The UC3-TouchDesigner is a comfortable PC-Tool available for this purpose.

Front view UC3-GTouch

Touch Screen

The UC3-GTouch is delivered with a 18 Bit TFT Touch Screen Display of 10.4". The resolution is 800 x 600 pixels. The Touch Screen functions based on the resistance principle: that means that the function of the UC3-GTouch Touch Screen Display only depends on the applied pressure and not on the material itself; therefore, the Touch Screen can also be operated with rubber gloves.

External Interfaces

The UC3-GTouch is equipped with one Ethernet, two USB, and one serial (COM1) interface as well as one cash drawer interface.

Thermal printer

The UC3-GTouch is equipped with a fast graphic label printer of 2".
Print width: 54mm; Resolution: 432 Dots, 8 Dots/mm; Max. print speed 125 mm/s

Weighing range

6kg	15kg	3kg/6kg	6kg/15kg	12kg	30kg
-----	------	---------	----------	------	------

Graduation

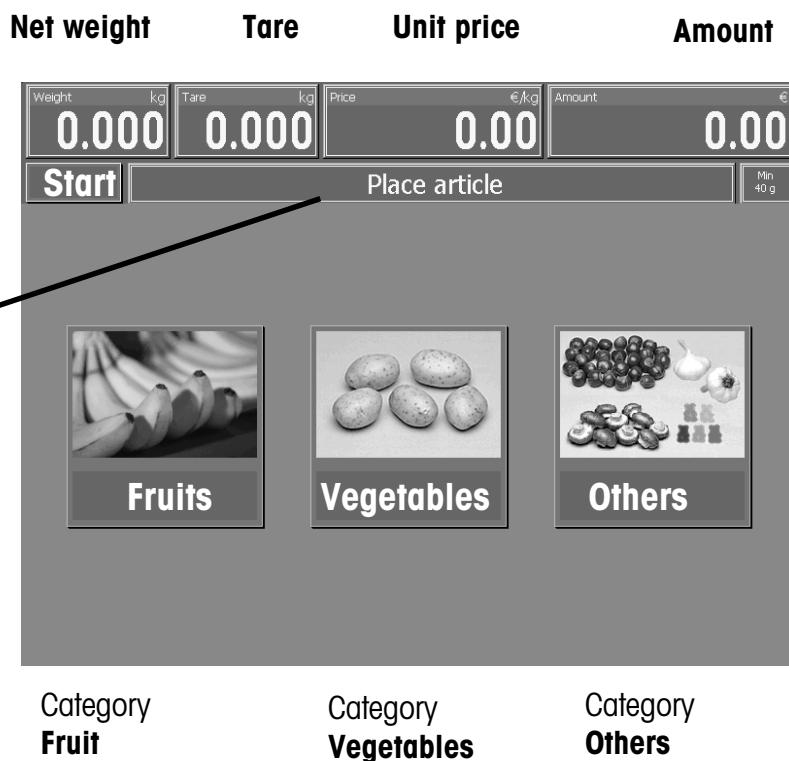

2g	5g	1g/2g	2g/5g	2g	5g

Picture of an article in the category **Fruit (with article short name, picture + shelf number)**

Maintenance of Self-Service scale

Prior to any intervention always pull mains plug from wall outlet.

Cleaning of scale

- Switch off scale and pull mains plug.
- Clean scale with a moist (not wet) cloth.
- Connect mains plug and switch on scale again.

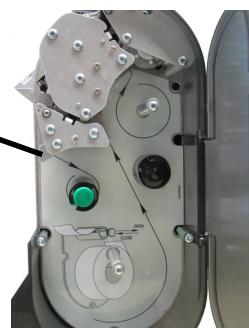

Clean scale with a normal detergent only.

Cleaning of print head

- Switch off scale and pull mains plug.
- Open door.
- Press release lever **downwards**.
The print head folds upwards.
- Take off cap from the cleaning pen.
- Clean the front part of the print head with the moist tip of the pen.
- Press print head **downwards** until it latches again.
- Close cleaning pen with cap.
- Connect mains plug and switch on scale again.

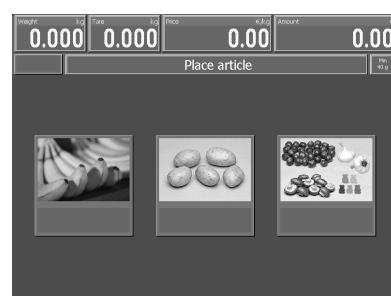

For cleaning of the print head only use the included cleaning pen. With other objects the print head could be damaged.

Maintenance of Touch Screen

The Touch Screen requires only little maintenance. For regular cleaning, the use of dry cloths or soft cloths with a neutral detergent (e.g. Ethanol) or a special Touch Screen cleaner is recommended.

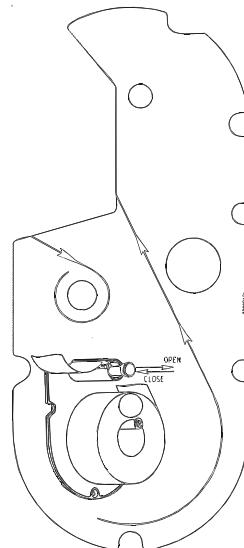

Please do not use any organic acid or alkaline solutions for cleaning!

Replacement of label roll

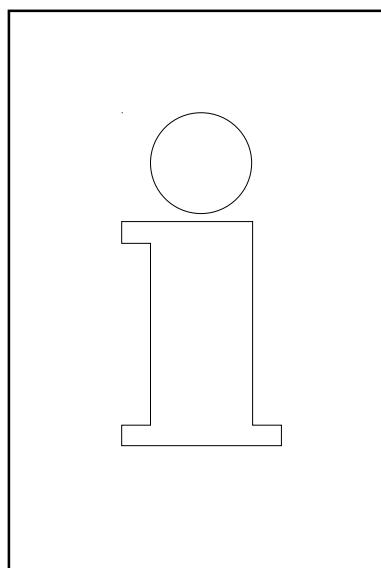

- Switch off scale and pull mains plug.
- Open printer door.
- Remove the core of the empty roll.
- Press release lever **downwards**.
The print head folds upwards.
- Pull wind-up spindle upwards and remove carrier tape.
- Insert new label roll as shown in opposite illustration.
- The leading edge of the paper is on the left side.
- Insert carrier tape in wind-up spindle.
- Pull thermal paper towards front until correct tension is reached.
- Press print head **downwards** until it latches again.
- Press paper feed key until a label is pushed out and correct tension of carrier tape is reached.
- Close printer door.

Instructions concerning thermal papers and thermal labels

The printer of the UC shop scales is a thermal printer. For this thermal printer, you should only use thermal paper or thermal labels from METTLER TOLEDO. These two types of paper have been submitted to a long-time test by Mettler Toledo and then released. They are also approved by the calibration authority to be used on UC shop scales.

If you use thermal paper or thermal labels other than those mentioned above, the print quality and lifetime of the print head risk to be diminished. In such a case, warranty for the thermal printer is void.

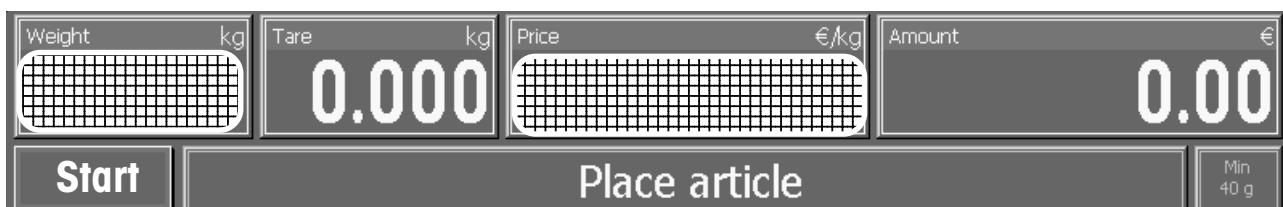

Functions in the Self-S. Mode

These functions of the Self-S. mode can only be selected if the weight indication shows "Zero **0.000**" or underload "**====**".

Paper feed

- Press **weight field** and **price field** subsequently within 0.5 seconds.

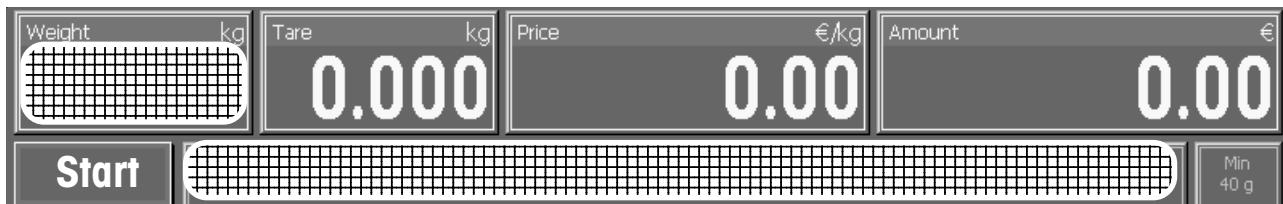

☞ Empty label is pushed out; apply for example after change of paper.

Sensor adjustment

- Press **weight field** and **info field** subsequently within 0.5 seconds.

☞ In case of error messages related to the label.
e.g.: **wrong label**

Primary tare off/on

- Press **weight field** and **tare field** subsequently within 0.5 seconds.

☞ Tare is valid for **all** articles
e.g.: same container.

Non Sales Mode

- Press **weight field** and **amount field** subsequently within 0.5 seconds.

☞ Start of the configuration mode

**Zero setting**

- Press **weight field** and “**min/max/e**” field subsequently within 0.5 seconds.

☞ Apply if weight indication of scale does not show **0.000**.

The scale is equipped with an automatic zero setting device which means that small weight modifications are compensated automatically (e.g. rests of grease on the weighing platform). The zero setting device is deactivated if a packaging weight is tared. After cleaning from dirt with the scale switched on, the display can show:

- a negative weight value,
- or underload „|_____|“.

Solution:

- Zero setting of scale

If the error message appears again:

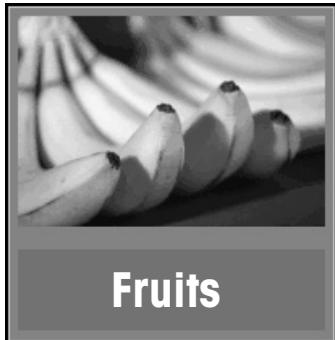

- Switch the scale off and on again (automatic zero-setting at switch-on).

Operation with symbol keys

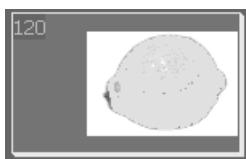

Operation with symbol keys

- Place goods to weigh on weighing platform

☞ The weight is shown on the display.

- Press category key

- Press symbol key

☞ The display shows article name, unit price and end price of the article.

- Label is printed

☞ At stable weight of scale.

- Remove label and stick it to weighed goods

- Place next goods to weigh on weighing platform

Non Sales Mode

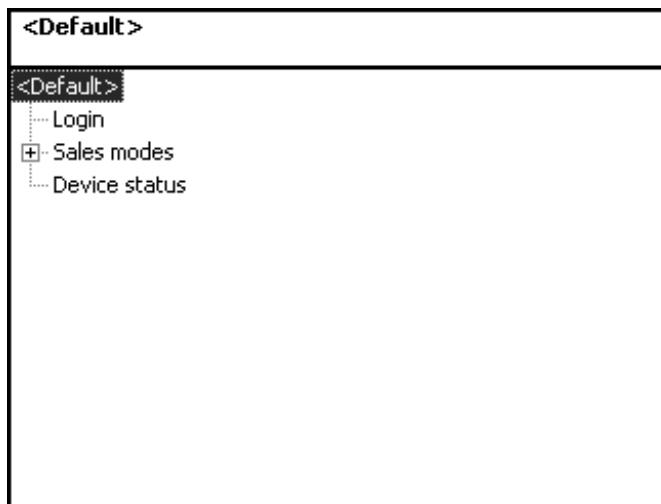

The Non Sales Mode (configuration mode) of the Self-S. mode can only be selected if the weight indication shows "Zero **"0.000"** or underload "**"===="**".

Start Non Sales Mode

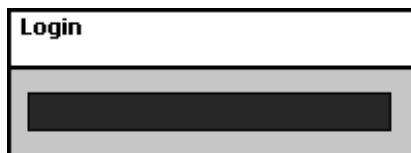

- Press **weight field** and **amount field** subsequently within 0.5 seconds.

Start of the configuration mode

- Numerical key 1

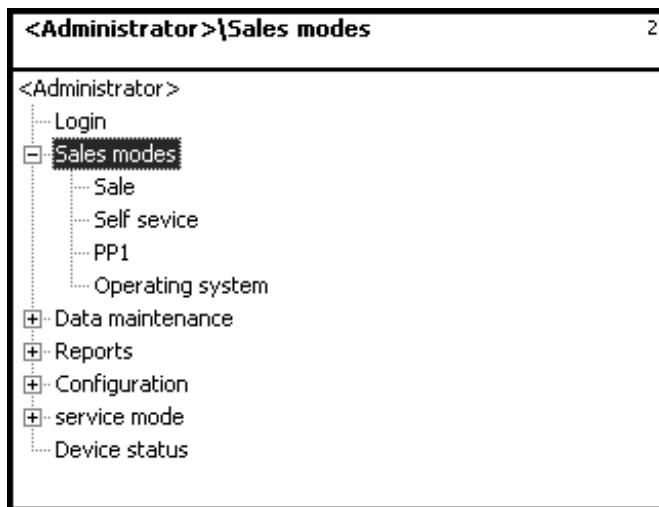

Enter code number via keyboard.

- Asterisk key

Confirm code number

↑ or ↓ key

- Scroll up/down

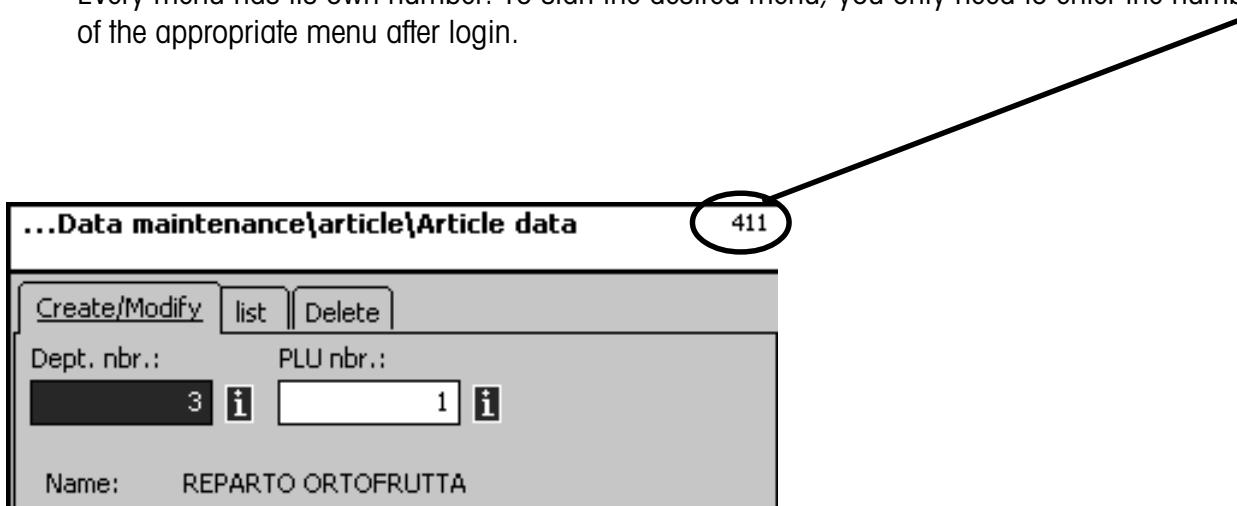

→ Select menu item.

Quick start in a menu

Note:

Every menu has its own number. To start the desired menu, you only need to enter the number of the appropriate menu after login.

4 1 1

- Enter figures 4 1 1

→ Create, modify, list, delete
Data maintenance/Article

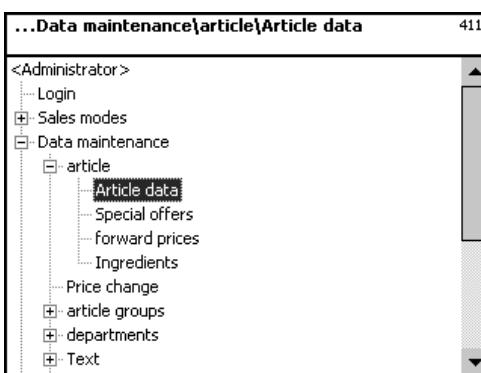

NonSalesMode (- Data maintenance)

Article (411)

create, list, delete

Quick start with 411:

In this window you can enter the basic data of an article or modify the data of an existing article.

- Asterisk key

confirm

...Data maintenance\article\Article data		411	
<input type="button" value="Create/Modify"/> <input type="button" value="list"/> <input type="button" value="Delete"/>

1st price	1.39	VAT nbr.:	0
2nd price:	0.00	VAT nbr.:	0

PLU Nbr. max. 6 digits

Dept. Nbr. max. 6 digits; this information is necessary if the new article has to be transmitted to all scales in this department.

The screenshot shows the 'Article data' screen with the following details:

- Create/Modify**, **list**, **Delete** buttons.
- Dept. nbr.:** 3, **PLU nbr.:** 2
- Name:** BANANE
- UAN:** (empty)
- 1st price:** 1.39, **VAT nbr.:** 0
- 2nd price:** 0.00, **VAT nbr.:** 0

- Asterisk key

☞ confirm

The screenshot shows the 'Article data\Modify' screen with the following details:

- Data 1**, **Data 2**, **Data 3**, **Label**, **Label** tabs. The **Data 2** tab is selected.
- Dept. nbr.:** 3, **PLU nbr.:** 2
- 1st price:** 1.39, **VAT nbr.:** 0, **UAN:** (empty)
- 2nd price:** 0.00, **VAT nbr.:** 0, **Article group:** 1, **Tare nbr.:** 2
- Name:** BANANE

☞ A field for entries with the article data appears.

- Code key

☞ Select tab Data 2.

The screenshot shows the 'Article data\Modify' screen with the **Data 2** tab selected. The entries are:

- Shorttext:** (empty)
- Purchase price:** 0.00
- Customer ID:** (empty)
- product tip mode:** Text, **Auto**
- PLU type:** Article by weight

Entries tab "Data 2":

Short text: The short form of the article text (max. 20 digits) will be displayed under the pictogram of the article if the short text field is available in the layout of the Touch Screen.

Purchase price: Purchase price of article.

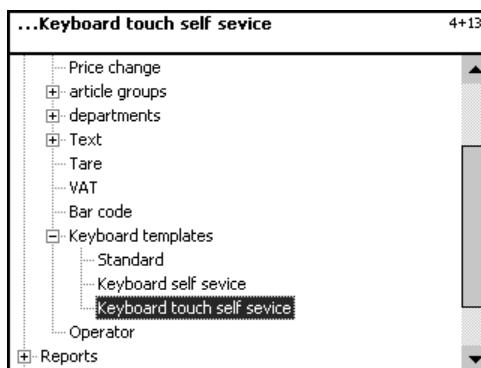

Customer ID: Shelf number resp. storage location of the article will be displayed under the pictogram of the article if the Customer ID field is available in the layout of the Touch Screen.

Keyboard Touch Self-S. (4+13)

create, modify, delete

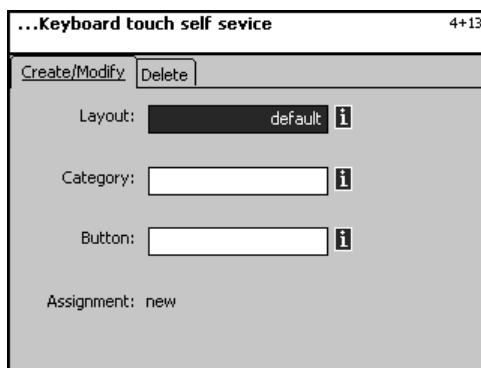

Quick start with 4+13:

In this window you can select different Touch Screen Layouts or modify Layouts (add new articles with pictogram, etc.).

• Asterisk key

confirm

Layout: Selection of different types of the Touch Screen Layouts.

Category: Selection of category.

Key: Selection as PLU key, forward (forward key) or back (back key) in the selected category.

If this field appears, you can display the available information in the form of a list and select from it with the - key.

Modify keyboard layout

- Select Layout (**default** setting)

Layout: **default**

- Select category

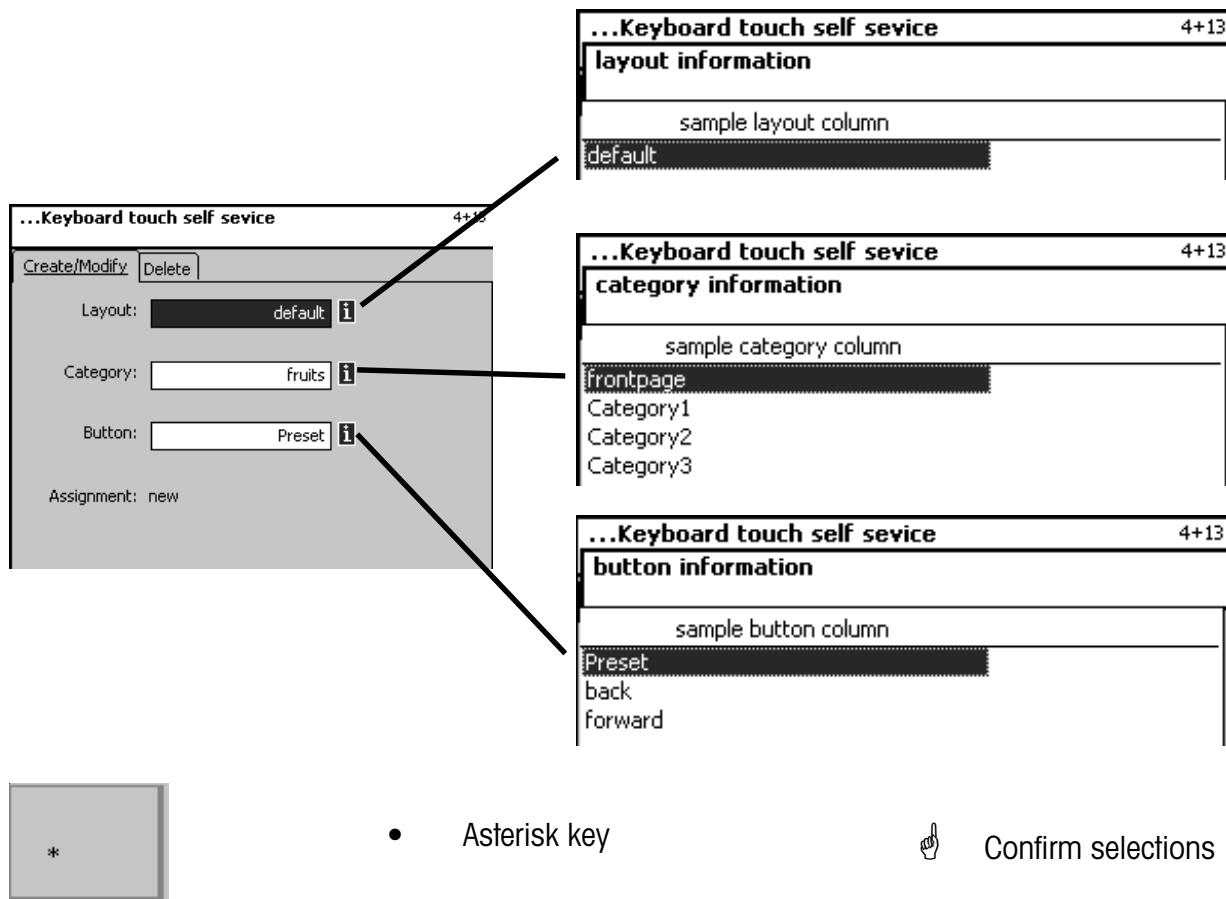

Category: **Fruits**

- Select type of key

Button: **Preset**

- In case of a preset key, the appropriate key number must always be entered.
Counting mode on the screen is from the top left to the bottom right.

In case of a forward or back key, the side of the screen on which they are located must be entered as well.

- Navigation in the menus.
